Re Item V.

1. The following documents are referred to in this communication:
D1: US-A-5 797 429 (SHUMWAY ET AL) 25 August 1998 (1998-08-25)
2. Document D1, which is considered to represent the most relevant state of the art, discloses (cf.col.5, line 21 - col.9, line 64, fig. 4 - 6) a valve from which the subject-matter of claim 1 differs in that it uses a five-way linear spool valve, comprising two pistons connected by a spool located inside a cylinder having five ports. By moving the spool back and forth within the cylinder, the ports are alternately opened and closed.
 - 2.1 The subject-matter of claim 1 is therefore new (Article 33(2) PCT).
 - 2.2 The problem to be solved by the present invention may be regarded as how to provide a valve with a simple construction and improved sealing.
 - 2.3 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:
A three-way two-position valve is provided, the valve comprising a housing with three ports, a valve chamber and a poppet body, the poppet body being adapted for reciprocation between two valve seats.
- 3 Claims 2 - 19 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VII.

1. The features of the claims are not provided with reference signs placed in parantheses (Rule 6.2(b) PCT).
